

Victor Olin

CSE student | Programming enthusiast

Background

I am a positive, ambitious and driven person with a big interest for technology. Everything from computers to airplanes. During secondary school I discovered a big interest for computers and more specifically programming. After secondary school I went on a sabbatical year and worked for education group AcadeMedia, where I got to develop several programs in different areas to simplify the workflow of my colleagues. My previous bosses describe me as responsible and has commended my ability to adapt to different environments.

Experience

- Good knowledge in .NET and programming in C#
- Experienced in other languages like C, Java, Javascript, Haskell and Python
- Perform well under stress and a good teamplayer
- Genuinely interested to develop and to learn new concepts

Interests

- Airplanes and flight simulators
- Everything regarding computers
- Programming

Education

CS Engineering degree, Chalmers

2020 - 2025

In the fall of 2020 I started my education to become an engineer with a speciality of computer science and engineering. I have always been fascinated by computers ever since I was young and during my first two years at Chalmers, I have learned a lot and discovered new areas that I have become very passionate about.

Technology program at NTI Gymnasiet, Stockholm

2016 - 2019

In secondary school I studied the technology program aimed towards university with a sight of becoming an engineer in computer science. During my three years I took extended courses in English, 3D-modelling and advanced mathematics.

Career

Technical support, AcadeMedia Support

2019 - 2020

After secondary school I took a sabbatical and worked for the largest education group in Scandinavia, AcadeMedia. It was a learning experience and I got to take part in the workflow of an IT department and see what challenges you are facing on a daily basis. I also took part in larger projects during my time there regarding development of tailored software and diagnostics of software from national IT contractors.

Estate technician, Fabege AB

2019, 2021

During the summers of 2019 and 2021 I worked as a real estate technician at Fabege in Stockholm. I got to learn a lot about operating systems of real estate and eventual limits and standards there are. I encountered a lot of problem solving on a daily basis within different areas such as internal servers and airflow systems.

Other merits

Active member of Spånga Scoutkår for 10 years

I have learned a lot from my years as a scout, including leadership skills, survival skills and teamwork during tough conditions. I took part in nightly sailings to and from Gotland during gales, skied 100 miles in the mountains during hurricanes and being a group leader for younger scouts. I have also had responsibilities from working in shifts during long sailings and ventures.

When I was younger I competed in air rifle shooting. In 2015 I won the district championship in Stockholm and placed 9th in the national championships.

I have category B driver's license for both automatic and manual transmissions.

References are available upon request.

A simple example of my interest in programming is this CV. This CV is completely written in \LaTeX and the source code can be found [here](#)!
